Full UK Driving License

PERSONAL STATEMENT

I enjoy all things technology, and I am always looking to learn more about web technologies to bolster my skill set. I am a self motivated avid learner who enjoys applying this to analysing and solving problems. I have been developing websites for 8 years now, with over 5 years commercial experience. Dealing with primarily Front End Development, most recently surrounding Laravel projects using Vue on the front end. I have a very strong knowledge of HTML5, CSS3/Sass, JavaScript (including ES6), Vue JS and have good knowledge of, PHP (OOP and MVC), SQL and Git.

I am a fast learner, and I am always keen to investigate up and coming technologies to remain bleeding edge within the industry. I am not adverse to change and always seek a resolution that is both beneficial to the team and in the clients best interest. I always aim to give 100% effort at all times whether this involves working as part of a team or independently.

I primarily work with E-commerce websites, being heavily involved with the build from start to finish, overseeing and building the front end of the site. However I do also get involved with back end and the configuration side of things. I am experienced and accredited with Prestashop but not limited to this as a platform, having used Magento in the past, as well as working on bespoke projects using frameworks such as Laravel and Vue.

SKILL SET

HTML5	Webpack	Laravel	SQL
CSS3/Sass	Grunt	Prestashop	Adobe Master Collection
Javascript (inc ES6)	PHP	Smarty	Wordpress
VueJS	Node	Git Version Control	Composer
jQuery	Homestead	Gulp	Chai/Cypress
Agile/Scrum	Vagrant	RESTful APIs	Jest
